

Security Management Partners Incident Response Retainer Program

SECURITY MANAGEMENT
PARTNERS

“SECURITY MANAGEMENT PARTNERS *has been our security partner for over 4 years. Whether conducting healthcare regulatory, IT audit and assessment or Incident Response work, we know we are getting the very best. Cape Cod Healthcare relies on SMP for our HIPAA based auditing and their invaluable opinion on any security-related work. Their dedication to our ongoing security and well-being has always been the driving factor in our relationship with SMP.*”

—**SHERYL J. CROWLEY**
Vice President and
Chief Information Officer
Cape Cod Healthcare, Inc.

Real Information Security from the Independent Experts

Let SMP be your Safety Net and IT Security Insurance Policy.

Security Management Partners offers comprehensive security protection for your organization against fraud; malware; virus infections; HR issues; evidence/data acquisition, preservation, recovery, analysis, and reporting; intellectual property theft; computer misuse; corporate policy violation; embezzlement; electronic harassment; system intrusion and compromise; encrypted, deleted, and hidden files recovery; illicit pornography; and confidential information leakage.

SMP's Flexible Retainer Contract Option allows your organization to accrue monthly hours and use the credits when an incident occurs. At the end of the contract, any unused hours are “banked” and you have an additional 12 months to apply the credits to any other of SMP's IT audit and assessment services.

It's Not a Question of IF, but WHEN an IT Security Incident will Occur.

Imagine These Common Scenarios...

Your IT network is hit by a virus or worm that keeps your employees from conducting day-to-day business.

An employee in your organization is the victim of harassment such as threatening emails or you determine that a staffer is embezzling company funds or sensitive data.

What Should You Do When an IT Security Breach Occurs?

1. Assemble your internal incident response plan.
2. Call SMP. Our security assurance guarantees our incident response or digital forensics team's timely response. Our professionals will be on-site, working with your staff and other vendors to guide your organization through difficult times, containing the attack and assisting in the resolution of the incident.
